Timber harvest and forest sector jobs data is from 2017. Wood processing data is from 2013.
Jobs data is from the Oregon Employment Department. Ownership, harvest data and map provided by the Oregon Department of Forestry.
Oregon's wood products industry is a traded sector, with close to 75 percent of all products made here sold outside the state. This state dominates U.S. production of softwood lumber and plywood. Now, it’s also a leader in engineered wood, and home to the first mill in the United States to manufacture structurally certified cross-laminated timber (CLT). Oregon forest landowners practice sustainable forestry and comply with the Oregon Forest Practices Act.

Lumber
- 5.5 billion board feet
- 16% of total U.S. production (No. 1 in U.S.)

Plywood
- 2.5 billion square feet
- 28% of total U.S. production (No. 1 in U.S.)

NO CHANGE IN NUMBER OF FORESTED ACRES IN OREGON SINCE 1953: STILL 30 MILLION ACRES

FOREST SECTOR JOBS (2017)
- Forest management: 6,952
- Forestry support: 13,239
- Primary forest products: 19,888
- Secondary forest products: 12,197
- Distribution, transportation: 8,775
- TOTAL: 61,051

Annual payroll: $3.3 billion

FORESTLAND OWNERSHIP (acres)
- Federal: 17.8 million
- Large private: 6.6 million
- Small private: 3.6 million
- State and other public: 1.1 million
- Tribal: 484,000
- TOTAL: 29.7 million

Nearly half of Oregon’s 63 million acres are forestland.

OREGON TIMBER HARVEST BY OWNER

Oregon's forests are managed for three primary purposes: timber production, multi-resource, including recreation, water and wildlife, and reserves with limited timber harvest that are set aside as parks or wilderness areas, or to protect endangered species habitat.

A BALANCED APPROACH - FORESTLAND MANAGEMENT CLASSES
