FORESTRY & WOOD PRODUCTS IN OREGON

Oregon's wood products industry is a traded sector, with close to 75 percent of all products made here sold outside the state. This state dominates U.S. production of softwood lumber and plywood. Now, it's also a leader in engineered wood, and home to the first mill in the United States to manufacture structurally certified cross-laminated timber (CLT). Oregon forest landowners practice sustainable forestry and comply with the Oregon Forest Practices Act.

A BALANCED APPROACH - FORESTLAND MANAGEMENT CLASSES

Oregon's forests are managed for three primary purposes: timber production, multi-resource, including recreation, water and wildlife, and reserves with limited timber harvest that are set aside as parks or wilderness areas, or to protect endangered species habitat.
